

3D Printing Electronics Conference

High Tech Campus Eindhoven, The Netherlands
7th edition
28 January 2020

www.3dprintingelectronicsconference.com

Scope

3D-printing has come a long way. Single material became multi-material with an ever-growing degree of detail and perfection. But that was just the beginning. As the world of 3D-printing is evolving, electronics is quickly becoming a new key player. Functional elements such as sensors and switches are now being integrated into 3D-printed products, paving the way for exciting new markets, applications and opportunities.

Thought leaders of this emerging market are converging in Eindhoven during the 3D Printing Electronics Conference to share their knowledge and expertise. Learn about 3D-printed embedded electronics in cars, pended optics and the 3D-manufacturing of smartphone antennas.

On the crossroads of science, technology and business in 3D-printing electronics they will fill you in on the latest breakthroughs, cutting edge research and business opportunities. Visit the upcoming edition of the 3D Printing Electronics Conference to share knowledge, create new partnerships and network actively.

The conference program is being developed, so please visit our [conference programme](#) for the latest programme updates or stay up to date via our newsletter.

Why should you participate?

The conference attracts a wide range of industry stakeholders and includes full industry coverage from component suppliers to manufacturers, from software developers to end-users. Plus, it offers you extensive network opportunities with business partners, buyers, legislators, and end-users. Whether your company is big or small, exhibiting at the networking area of the 3D Printing Electronics Conference gives your company a powerful platform for:

- Increased market visibility and presence.
- Brand building.
- New product presentation and demonstrations.
- Having face-to-face meetings with new and existing clients.
- Obtaining full international media exposure.
- Meet new partners, suppliers and more.
- Networking

Target groups:

- Decision makers in the industrial supply chain, such as CTO's and COO's of OEMs, managers of (high tech) suppliers and subcontractors
- Procurement management
- Investors
- Design & engineering experts
- Professionals involved in developing electronic products, such as product designers, engineers, product managers, (consumer) electronics manufacturers, software developers and 'internet of things' system integrators
- Anyone curious about new technologies and developments in the (3D)printing electronics/optics/photo

Communication

The 3D Printing Electronics Conference will be announced and frequent updates will be communicated via various channels. Exposure for our sponsors and partners will be attained via direct e-mailing to an high-quality and exclusive database of 3D printing stakeholders around the world.

We will communicate about the conference in the following ways:

- Website and news
- Twitter
- Facebook
- LinkedIn
- Newsletter which will be sent out every week from September 2019 onwards

The communication strategy also includes online advertisements, button-advertisements, advertisements in printed magazines and notification of the conference on the websites of the supporting media partners. The conference will be equally supported in the blogs, trade press, newsletters, websites and twitter accounts of the international media partners.

Sponsorship options

	Partnerships			
Facilities	Start up	Bronze	Silver	Gold
	€ 750,-	€ 1.250,-	€ 1.750,-	€ 2.250,-
